SUMMARY

I aim to enhance my knowledge and skills through continuous learning and professional development opportunities in the field of computer applications.

SKILLS & PROFICIENCIES

- Web Technologies : HTML,CSS and JavaScript
- Frameworks : React js, Flutter, DOT NET, React Native (Basics)
- Databases: SQL Server
- Programming Languages : PHP , Java , Python,Dart, C#
- Wordpress, Adobe Xd,Android studio

PROJECTS

- **HI-Tech Cybernetic Open Deal**

This project is to provide a facility for conducting online auction of products using the high security Captcha System . Users can bid for the products after registration. The system is developed using java 1.8.

- **B-Safe (Women Safety Application)**

An android app which is developed using React native can instantly alert the Guardians (along with user location) whenever the user is in an emergency situation. It can be triggered just by shaking the android device in which the app is installed.
